

Block-Lock

Installation Guide

Components and tools for building your glass block with Block-Lock

- Glass blocks
- Special Block Lock Glue
- 18cm strips for vertical joints between blocks
- Longer strips for horizontal layers and walls.
- Spirit Level
- Hacksaw
- Grouting tools

Check that the wall and floor are flat and there is a 90 deg (right) angle between the two.

Apply a bead of glue to the centre of the long strips and press firmly into place on the wall and floor.

Apply a bead of glue to the face of the strips then press blocks firmly into place.

Apply the glue to the 18cm strips for the vertical joints between each block.

Glue the 18cm strips onto sides of the preceding blocks.

Glue the appropriate length of longer strips on to each horizontal course.

Glue the metal end channel to the side and top of wall.

Hey presto...Just the grouting to do.

It's as easy as that!
